

IAN HOLENDER

Mexico City • +52 (55) 4790 3290 • holenderian@gmail.com • linkedin.com/in/ianholender

Fullstack Developer, Data Engineer, and Data Analyst, currently building end-to-end products at **eShip/Segmail**. I develop customer-facing features, analytics dashboards, and e-commerce and LLM integrations on React/Node.js, and design modern, event-driven data architectures on Microsoft Fabric/Azure. My work has reduced processing times by 35% and supported operations across 3,400+ stores.

EXPERIENCE

eShip/Segmail

Fullstack Developer

Mexico City

February 2026 – Present

- Build and integrate a Customer Service module with an incident-management system into the platform's v2.0, including "Chatter," a real-time client-agent messaging service for smoother support (React, Node.js, MySQL, Twilio).
- Develop an intelligent support chatbot on the order-tracking page using LLMs (OpenAI) to automate customer assistance.
- Create analytics dashboards with detailed shipment and order insights and build an automations module in v2.0 (Recharts/ApexCharts).
- Build an inventory module integrating ShipHero, Mercado Libre, Amazon, and Odoo.
- Integrate e-commerce platforms (Shopify, Odoo, Tiendanube, Wix) to extract orders and inventory, and implement interactive onboarding walkthroughs for new clients.
- Design and implement an MCP server to query and act on account data through large language models.

Corporativo Tiendas 3B

Data Engineer

Mexico City

May 2025 – January 2026

- Contributed to the Tiendas 2.0 project by implementing an event-driven architecture with real-time event ingestion and processing, leveraging KQL-based databases to enable high-performance analytics and operational monitoring.
- Designed and optimized data pipelines across 21 regions (~3,400 stores), enabling scalable extraction of sales data.
- Improved performance of the Main Pipeline powering 10 semantic models, reducing refresh time by 35%.
- Reduced ticket-data extraction from 4h30 to 1h07 through Azure Data Factory and Microsoft Fabric.
- Implemented CI/CD pipelines with Azure DevOps in Microsoft Fabric, streamlining deployments.
- Developed a Data Hub landing page centralizing dashboards and documentation, improving data accessibility for 570+ directors and managers.

IBSO

Data Analyst

Mexico City

January 2024 – June 2024

- Managed dashboards for MAPED, Grupo JULIO, and TISA, providing actionable insights that optimized inventory management and operational efficiency.
- Designed and maintained interactive Tableau dashboards, improving KPI tracking, sales-trend analysis, and stock management for diverse clients.
- Collaborated with business teams to identify operational bottlenecks, delivering insights that boosted sales performance by ~15–20%.

Shoplogix

Marketing & Business Development Intern

Mexico City

October 2022 – June 2023

- Produced digital and multimedia content to support client acquisition and strengthen the company's market presence in LATAM.
- Supported the redesign of the LATAM website, improving usability and alignment with client needs, which increased lead generation.

PROJECTS

MeshCode

Co-founder · meshcode.io

Real-time infrastructure that lets multiple AI coding agents (Claude Code, Cursor, Cline) collaborate as a team across machines through shared memory, task boards, MCP message passing, and a live dashboard with session replay and a force-directed mesh graph; shipped a published Python CLI (`pip install meshcode`).

Tech: React 19, TypeScript, Vite, Tailwind, Supabase (Postgres/Auth/RLS), Python MCP server, Cloudflare Pages, Playwright.

Certificaciones AI

Founder · certificacionesai.com

E-learning platform of AI courses for a non-technical LATAM audience — 15 courses / 110+ lessons with quizzes, an AI tutor and sandbox, personalized learning plans, PDF certificates, and an admin panel with real metrics.

Tech: Next.js 16, React 19, TypeScript, Tailwind 4, shadcn/ui, Supabase, Prisma, Gemini/Groq LLMs, i18n (ES/EN), Vercel.

Nexsys — Credit Operations Platform

Founder · misfichasnexsys.com

Web platform managing the full lifecycle of credit applications (capture → review queue → approve/reject) across sales, credit, and admin teams, with role-based access, per-field comments, access logs, and an analytics dashboard.

Tech: React, Vite, Tailwind, Node.js, Express, PostgreSQL, JWT + bcrypt, Vercel.

Visión 360

Founder · shoplogix-vision360.com

Multi-user CRM for a consulting firm with a role-based hierarchy and hermetic multi-tenant isolation (RLS). Includes executive dashboards with 3D world-map visualizations, referral/talent Kanban boards, automated weekly email digests (cron), and a data-grounded AI assistant with streaming and multi-provider fallback.

Tech: Vite, React, TypeScript, Supabase (Postgres/Auth/Edge Functions/RLS/pg_cron), three.js, Chart.js, Resend, Vercel.

NotarIA

Founder (in progress) · notaria-app-beta.vercel.app

AI-powered notarial-management platform built as a next-gen replacement for legacy systems (DBASystem, IN4, Cati@). Multi-tenant per-notary isolation with modules for case files, a unified identity archive (RFC/CURP/CFDI 4.0, PLD), and an operations catalog, plus AI-assisted capture and document generation.

Tech: Next.js 16, React 19, TypeScript, Tailwind, shadcn/ui, Supabase (Postgres/Auth/Storage/RLS), Anthropic SDK, Vercel.

EDUCATION

Instituto Tecnológico de Estudios Superiores de Monterrey (Tec de Monterrey)

Mexico City

B.S. in Computer Technologies Engineering

August 2021 – June 2025

Universidad CEU San Pablo

Madrid, Spain

Program in Marketing & Digital Marketing

August 2024 – January 2025

CORE COMPETENCIES

- | | | |
|----------------------------|----------------------------------|--------------------------------|
| • Full-Stack Development | • Scalable Data Pipelines | • Data Quality & Compliance |
| • Cloud-native Engineering | • API Design & Integration | • CI/CD & Automation |
| • Backend & Data Systems | • Cross-functional Collaboration | • System Design & Optimization |

TECHNICAL SKILLS

Languages & Data: Python, SQL, KQL, JavaScript, TypeScript, C/C++, C#, PySpark

Web & Fullstack: React, Node.js, Express, HTML, CSS, Tailwind CSS, Material UI, REST APIs, MySQL

Cloud & Data Engineering: Microsoft Azure, Microsoft Fabric, Azure Data Factory, Azure DevOps (CI/CD), AWS (S3, RDS), Vercel

AI, BI & Integrations: LLMs (OpenAI, Anthropic), MCP, Power BI, Tableau, e-commerce (Shopify, Amazon, Mercado Libre, Odoo)

Tools & Design: Git / GitHub, Figma, Canva, Adobe Premiere Pro **Languages:** Spanish (Native), English (B2)
